

After downloading eDelaware™, verify your BlackBerry Permissions are set properly as follows:

- On the Home screen, click **Options** (wrench icon)
- On the Options menu, click **Advanced Options**
- On the Advanced Options menu, click **Applications**
- On the Applications menu, click **eDelaware\_os40**
- Click **Edit Permissions**

You should see three main categories:  
Connections, Interactions and User Data.

Click on **Connections** and choose **Expand** so you can see the parameters under Connections.

The last item under Connections is **Carrier Internet**, which should be set to **Allow**.

If you see either **Prompt** or **Deny** listed next to Carrier Internet Setting, please change it as follows:

- Click **Carrier Internet**
- Choose **Change Option** - set to **Allow**
- Click again - choose **Save**
- Click again - choose **Close**

Escape out of the tools menu back to the home screen.
